CLEAN ROOMS AS A SPECILAZIED FIELD

Complete Clean Room HVAC and BMS systems engineering

As a result of having mastered the application of one of the most demanding ventilation system – Clean Room Technology (CRT), we have set up a separate department within the company - TERMOVENT ENGINEERING, which provides a full service in the field of cleanroom HVAC:

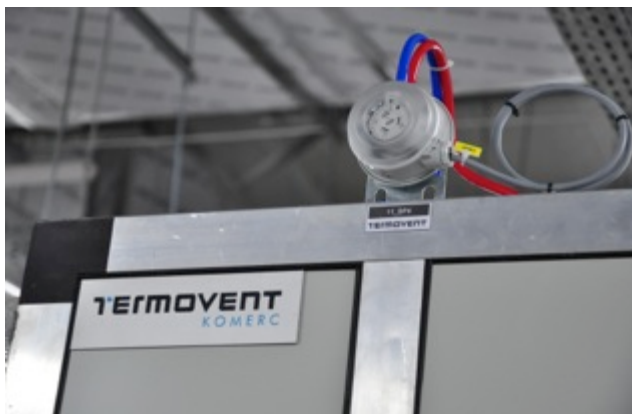

- Complete cleanroom HVAC system design, according to the latest valid GMP and FDA standards.
- Manufacturing, delivery and installation of specialized cleanroom HVAC equipment (CRT products).
- System commisioning, start up and measurement with calibrated measuring instruments.
- Preparation of validation documents in accordance with the latest valid GMP and FDA standards as follows: validation master plan (VMP), functional design specification (FDS), design qualification (DQ), installation qualification (IQ), operational qualification (OQ), equipment list (EQL) and complete commisioning tests.

Thanks to the high-quality level and reliability of HVAC applications, we have become strategic partners to the leading international pharmaceutical companies, such as: **Pfizer Global Manufacturing, Wellpharma Medical Solutions, Purna Pharmaceuticals, Delpharm, Dishman Netherlands, ADOC, NV Tube Souples, S.M.B. Technology S.A, Hemofarm AD, Actavis, Bionika Pharmaceuticals, ...**
